

Omar Aburub

Full-Stack Developer | Software Engineer | Product-Focused Builder

Amman, Jordan | omar.abualrob@gmail.com | +962782329277

GitHub: <https://github.com/omaraburub-byte> | LinkedIn: <https://linkedin.com/in/omar-aburub-profile>

Portfolio: <https://omar-aburub.vercel.app>

Profile

Full-stack developer focused on modern digital products, responsive interfaces, backend systems, and AI-powered workflows with experience in Flutter, Node.js, Supabase, accessibility-aware systems, and scalable UX-focused engineering. Built and shipped multiple national-scale bilingual platforms and presented original research at IEEE conferences.

Education

Applied Science Private University

Amman, Jordan

B.Sc. in Software Engineering

Expected 2027

GPA: 89.2% | Rank: 16

Technical Skills

Languages: Python, HTML, JavaScript, Java, Dart, C++, C#, SQL, Latex

Frontend: Flutter, React, HTML5, CSS3, Responsive Design, Figma

Backend: Node.js, Firebase, Supabase, MySQL, REST APIs

AI & Systems: Hugging Face, OpenCV, Ollama, Prompt Engineering

Tools: Git, GitHub, VS Code, Android Studio, Cursor, Figma, Notion, Katalon, n8n, Jira, Overleaf

Experience

ByteGene — Co-Founder & Team Lead Manager

2024 – Present

- Lead end-to-end delivery of client web platforms, from architecture and UI/UX design through deployment.
- Manage frontend-backend integration and responsive redesign projects across a multi-developer team.

IEEE Applied Science Private University Student Branch — Ambassador & Research Contributor 2025 – Present

- Authored a research paper on bidirectional mapping between interface interactions and code, submitted to IEEE AECT 2026.
- Presented original CodeBERT-based research at the IEEE IJSPC 2026 competition finals.

Software Engineering Club — Organizer & Designer

2023 – Present

- Organized technical competitions and designed scalable UI/UX systems for university initiatives.

Projects

NAFES — National Educational Competitions Platform

- Built a production Flutter platform for a national competitions program, with role-based flows, bilingual Arabic/English RTL UI, and dark/light theming.

Mowathaq & Etafiq — National Verification & Digital Contracts Platforms

- Developed two additional production Flutter apps for national digital infrastructure: a digital evidence verification platform and a digital contracts platform, both bilingual RTL with role-based architecture.

EvalUI — AI Accessibility Evaluation Framework

- Developed a computer vision-based UI evaluation platform using OpenCV, Gradio, saliency analysis, and WCAG validation workflows.

SUTimer — Figma Productivity Plugin

- Built a custom Figma plugin integrating realtime Firebase synchronization, collaborative counters, and timer automation.

ByteGene — AI & Technology Solutions Platform

- Designed and developed the official responsive website for ByteGene with scalable modern UI/UX architecture.

Awards & Achievements

- Best Ambassador Award — IEEE IJSPC 2026
- Top 5 Student Researcher in Jordan — IEEE JCSPC 2025
- Top 10 — IEEE PixelSite 2025 Web Design & Development Contest
- IEEE Student Ambassador — Applied Science Private University
- Runner-Up — IT Academy Champions League (Software Engineering Track)
- 1st Place — Software Engineering Contest 4 (SEC4)

Certifications

- PCEP™ — Certified Entry-Level Python Programmer
- AI and Quantum Computing — Orange Jordan
